PROFILE

I'm a passionate and self-driven tech enthusiast with hands-on experience in web development, web design, and basic automation testing. I enjoy creating real-world projects that solve meaningful problems and improve user experiences.

My core focus areas include software development, quality assurance, and full-stack technologies, with growing expertise in Java, Selenium, MySQL, and modern frameworks like the Laravel. I'm eager to continuously learn, experiment, and tackle new challenges in my journey to becoming a skilled IT professional.

EDUCATION

HIGHER NATIONAL DIPLOMA, Information Technology

2023 - 2025

ATI- Sammanthurai

General Certificate of Advanced Level, Biological Science

2017 - 2022

KM/Zahira College, Kalmunai

SKILLS

- Languages: Java, JavaScript, Php
- Database Management: MySQL
- Frameworks: React, Laravel
- Version control: git & GitHub
- Web Design: UI/UX design
- Web Development
- Tools: Figma
- MS Office Packages: Word, Excel, PowerPoint, Etc

PROJECTS

Hardware Shop Management System

Designed and developed a full-featured desktop application using Java Swing and MySQL. Implemented modules for admin management, item management, customer records, and billing. Focused on database integration, user interface design, and smooth transaction processing

Self learning mini projects

Built several full-stack web applications using React.js, Node.js, and Express.js. Automated web tasks using Selenium WebDriver. Designed professional UI/UX prototypes using Figma and Canva.
